LEADERSHIP
IN ECG DATA
MANAGEMENT

P R O D U C T F E A T U R E S

- **Digital ECG Data Management** – Digital storage of ECG reports provides for serial review, ease of access, remote editing, viewing and a long term archival solution for patient records.
- **Enterprise Wide Access to Data** – Network wide access to ECG reports allows for access across the enterprise including support for remote dial-up connections to improve data access wherever required.
- **Security** – Superior security implementation includes multi-layer login, administrator controlled passwords, account management, transaction logging and audit trails.
- **Workflow Enhancement** – Configurable, automated processing of routine tasks to increase ECG data review and reporting efficiency.
- **Data Mining** – Standard or customized SQL queries available to produce administrative reports or generate results on research oriented queries.
- **Interface Options** – HL7 interface option supports connectivity with hospital and clinical information systems for both order processing and results reporting.
